## PROFESSIONAL EXPERIENCE

---

### PT CENTRAL FINANSIAL X (CFX)

Jakarta

#### Product Associate

May 2025 - Present

- Converted from intern to associate. Managed internal data flows across perpetual futures operations, building safeguards for fee accuracy, implementing mismatch alerting, and automating financial reporting workflows for the finance team.
- Led the initial onboarding of a trade surveillance function for perpetual futures, while building the underlying platform from 0 → 1, including SOPs, surveillance algorithms, and monitoring dashboards.
- Identified gaps in order book depth and uptime, built alert-based monitoring for the liquidity team to achieve ~99% market-making SLA compliance for the first time.
- Designed and shipped isolated margin and dynamic leverage controls as core risk management features for high-leverage perpetual futures trading.

### FREELANCE SOFTWARE DEVELOPMENT TEAM

Remote

#### Full-Stack Developer

November 2024 - July 2025

- Led product delivery for two clients, from discovery and scope definition to deployment.
- Developed a personalized e-commerce platform generating Rp 40 million+ in client revenue per month, integrating third-party APIs, payment gateways, and responsive UI/UX.
- Built an automated catalog management and dashboard, enabling Excel-based uploads to streamline 470+ SKUs and providing control over inventory, transactions, refunds, loyalty programs, and tracking revenue.

### SOLUTIF

Jakarta

#### Software Developer Intern

June 2024 - November 2024

## ACHIEVEMENTS

---
